FOR IMMEDIATE RELEASE

9:00 A.M. CDT, Thurs., Aug. 16, 2018

Periodic Street Closures to allow for Street Resurfacing: 27 Blocks in Southeast Sedalia

A major street resurfacing project is scheduled to begin in southeast Sedalia on Aug. 20, 2018, weather permitting, and is anticipated to be complete by the end of Oct., 2018. The area is bounded on the west by S. Massachusetts Ave., on the east by S. Ingram Ave., on the south by the City limits and on the north by E. 24th St.

Beginning on Monday, Aug. 20, 2018, the following North-South running streets will be closed to traffic for milling and resurfacing. This work requires closing of the following streets and residents who routinely park along these streets or access driveways from these streets will need to find alternate parking along East and West running roadways for 1-2 days during the initial phase of the project. During the second week of the project, East-West running streets will be milled and resurfaced and residents routinely parking along these streets or accessing driveways from these streets will need to find alternate parking along North and South running roadways for 1-2 days. Street Department staff is attempting to make contact with all residents and are posting signs regarding the work zones.

North-South Running Streets (beginning Aug. 20, 2018)

- S. Washington Ave. between 24th St. and the City limits
- S. Massachusetts Ave. between 24th St. and E. 28th St.
- S. Lafayette Ave. between E. 24th St. and E. 28th St.

East-West Running Streets (anticipated to begin Aug. 27, 2018)

- E. 25th St. between S. Ingram Ave. to the end of the roadway
- E. 26th St. between S. Ingram Ave. to end of the roadway
- E. 27th St. between S. Ingram Ave. to end of the roadway
- E. 28th St. between S. Ingram Ave. to S. Massachusetts Ave.

This roadwork does include two phases. During the initial phase, residents will need to find alternate parking until the roadway has been milled and compacted which is anticipated to take 1-2 days. After completion of this initial work, residents can drive and park on the street during an approximately 30 day cure period prior to installation of the final two inch (2") asphalt cap. When asphaltting of each street is scheduled, residents will be notified through additional Public Service Announcements.

We apologize for any inconvenience these road closures may cause as we work to improve this area. Please note that this resurfacing project is weather dependent and may be delayed due to rain.

When: Mon., Aug. 20, 2018 through Oct. 31, 2018

Where: Area bounded on the west by S. Massachusetts, on the east by S. Ingram, on the south by the City limits and on the north by E. 24th Street

Why: Street Reclaiming
