FOR IMMEDIATE RELEASE
3:30 P.M. CDT, Oct. 31, 2017

Street Maintenance: North Engineer Avenue between E. Saline St. and the Union Pacific Rail Crossing

Beginning at 7:00 a.m. on Nov. 1, 2017 and continuing through 3:30 p.m. on Nov. 9, 2017, weather permitting, the Street Department will be completing roadway maintenance and resurfacing of N. Engineer Ave. from E. Saline St. south to the Union Pacific rail crossing. Sidewalks will remain open to pedestrian traffic throughout the street maintenance project. Motorists planning to travel through the area during the construction period, Nov. 1 to Nov. 9, 2017 are encouraged to use alternate routes to avoid delays due to lane restrictions or road closures.

Preparation work is planned to begin on Nov. 1 and continue through Nov. 6. This work includes the milling of existing asphalt surfaces and preparing other sections of the street impacted by weather and excessive wear for resurfacing. As a result, the roadway may be uneven and rough until the new asphalt surface is applied. Resurfacing will begin on Nov. 7, weather permitting, and is planned to be complete on Nov. 9. Motorists are advised to use caution in the area, be aware of warning signs related to bumps and other uneven surfaces, be aware men and equipment are working in the area and to reduce speed as necessary to arrive safely at their destinations.

We apologize for any inconvenience due to these lane restrictions and road closures as work to improve the roadways is completed.

When: Wed., Nov 1, 2017 through Thurs., Nov. 9, 2017
Where: North Engineer Avenue between East Saline Street and the Union Pacific rail crossing
Why: Roadway Improvements
